

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Reporting Requirements Not Met for City of Shavano Park Water System

We are required to report that the results of monitoring of our drinking water for the months of April, May, June, July and August of 2016 – were insufficient, only one sample per month was taken and reported. Results of our regular monitoring showed that each test passed during those months and are an indicator that our drinking water met all health standards. During the months of April, May, June, July and August of 2016 we showed that we did not take enough samples each month for assessment of contaminants.

Our system failed to notify the State Drinking Water Program as required by April, May, June, July and August of 2016. Although public health was not impacted, as our customers, you have a right to know what happened and what we did to correct the situation.

What should I do?

There is nothing you need to do at this time. You do not need to boil your water or take any other actions.

What is being done?

While we did not notify the State as quickly as we should have, we began taking 2 samples each month as of September 2016. We are no longer in violation.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
